Our traditional range encompasses our particleboard/MDF and wooden veneered options. New Zealand MDF is made from renewable, sustainable local forests (predominantly pine). Our caskets are available with flat lid or raised lid options and most have matching urns.

All Paterson's caskets are made by local tradespeople.

Speak to your Funeral Director about which option works best for you.

Willow

A fast growing, eco-friendly and sustainable material, which benefits from regular cropping.

Willow absorbs, and locks in, carbon dioxide during growth. When buried the CO2 remains locked in. If cremated, only the same quantity is released back into the environment - making it 'Carbon-Neutral.' Willow grows without the need for fertilisers, and actually builds fertility in poor or depleted soil.
